

## Task 2 Report

**Email ID:** [Kryptoglific@gmail.com](mailto:Kryptoglific@gmail.com)

**Task Title:** Task 2

**Task Description:** Web Development ,Car Launch.

**Steps taken:** I managed to create a html page that consist of cars, the page has a menu in which a user may be able to click on to access other information.

**Challenges Faced:** The problem I, encountered was the css part where by having to align text as well as aligning the css codes accordingly.

**Soultions Implemented:** Had to often debug codes that I have made which I was focusing on my logic errors which led to some codes not being read on the website created.

**Learnings:** The images inserted on page are the ones that fit on my screen resolutuion to make the miages a background cover and not to leave and left out spaces behind.

**Project Update:** Managed to come up with delhpi techniques in order to surpass the taks 2 and be able to have time preparing for task 3
